

CARE BEDS WITH COMFORT AND SAFETY

For over a decade, we are ensuring that people in need of care do not have to miss out on one thing: quality of life. We have a selected range of products that meets every requirement, both in home care and care homes. Our care beds are distinguished by their high quality, ergonomic design, safety, comfort, hygiene and aesthetics. High functionality and easy handling make everyday life easier for not only the person in need of care, but also for caregivers.

CARE AT HOME

Care within your own home places high demands on the functionality, quality and safety of the care bed. Tecfor care's care beds are specifically designed for home care and offer maximum comfort and intuitive operation. Our beds are not only designed to meet the needs of those in need of care, but also to make everyday life easier for the caregivers.

CARE INSTITUTIONS

We create living spaces for people in need of care and offer complete furnishings from one single source. When developing our care beds, care furniture and appropriate accessories, we consider both - the functional and emotional demands of residing and living in a nursing home. Together with our customers, we design living spaces that make you feel at home. This creates a good environment for people to live with a quality of life.
