

CARE BEDS WITH COMFORT AND SAFETY

For over a decade, we are ensuring that people in need of care do not have to miss out on one thing: quality of life. We have a selected range of products that meets every requirement, both in home care and care homes. Our care beds are distinguished by their high quality, ergonomic design, safety, comfort, hygiene and aesthetics. High functionality and easy handling make everyday life easier for not only the person in need of care, but also for caregivers.

ACCESSORIES

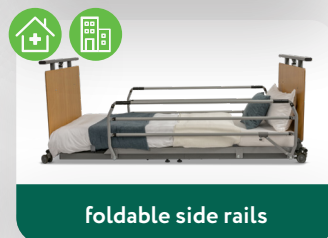

Side rails

It is essential to have a stable and safe side rail for a nursing bed in both home and residential care. Our portfolio provides the right side rail for the resident's requirements.

Accessories

Our large portfolio of accessories enables you to equip the care bed with the desired accessories. The bed extension gives larger residents more space to be comfortable, the grab handle and the lifting pole enable easy mobilization. The tray allows the resident to do activities such as eating and reading comfortably in bed.

Wall protection

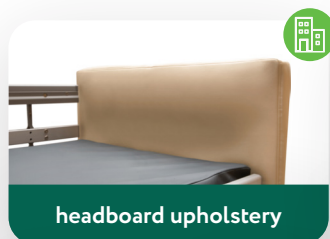

It is advisable to utilize wall deflector systems to prevent any damage to the nursing bed, walls, or furniture. We would be happy to assist you in selecting the appropriate system for your needs.

ACCESSORIES

Further accessories

Our other bed accessories include a variety of products designed to improve patient comfort and care. These include for instance the infusion pole, the bed light, and the underbed light. Through our accessories, we aim to provide the best possible care, thereby enhancing the quality of life of the person in need of care.

Side tables / cabinets

Side tables and bedside cabinets are important components of any room's interior. They are a practical addition and have a great functionality. The furniture provides a convenient storage space for both private and medical items.

Upholstery

Upholstered parts of the bed help to prevent impact injuries caused by medical conditions or restless sleep. In order to prevent this we provide appropriate upholstery for different parts of the bed.
