

## Bed Lamp

- ✔ lamp head is flexible through gooseneck for individual adjustment
- ✔ simple handling by handset or cord switch
- ✔ can be used individually on every tecfor care bed

The bed light can be fitted in the holder for the patient lifting pole and therefore can be used with any tecfor care bed. Depending on the version, it can be operated either by cord switch or by switch on the care bed handset. The gooseneck allows individual adjustment, directing the light wherever required.

## Features

- colour: RAL 9006 (silver)
- material: aluminum
- light colour: warm white
- power supply is through power adaptor of the bed or separately through own power supply
